

ANISH KUSHWAHA

Full Stack Developer | React · Next.js · Node.js · PostgreSQL

Jaipur, Rajasthan, India | +91-7014756534 | anishsinghkushwaha03@gmail.com

github.com/anishkushwaha03 | linkedin.com/in/[YOUR-LINKEDIN-HANDLE] | [PORTFOLIO-URL]

PROFESSIONAL SUMMARY

Full Stack Developer building and scaling a production-grade legal-tech platform full-time with React, Next.js, Node.js, Express.js, and PostgreSQL. Skilled in relational database design, secure RESTful API development with JWT authentication and role-based access control, real-time WebSocket systems, and cloud deployment on AWS and Vercel. Strong foundation in data structures, algorithms, and OOP.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, C++, C, HTML5, CSS3

Frontend: React.js, Next.js (App Router, SSR, SSG), Redux Toolkit, TanStack Query, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, RESTful API design, Socket.io, WebSockets, JWT authentication, Role-Based Access Control (RBAC), Zod validation, rate limiting, HMAC verification

Databases: PostgreSQL, MongoDB, Supabase, Redis, relational schema design, indexing, query optimization, Row Level Security (RLS)

Cloud & DevOps: AWS S3, Vercel, Git, GitHub, GitHub Actions (CI/CD), Docker (familiar), Postman, npm

AI & Automation: Anthropic Claude API, prompt engineering, structured outputs, AI agent workflows, n8n

Concepts: Data Structures & Algorithms, Object-Oriented Programming, MVC architecture, Agile / Scrum, SDLC, unit testing, code review, debugging

PROFESSIONAL EXPERIENCE

LawDocs | Jaipur, Rajasthan (Remote)

Software Developer (Full-Time) | August 2026 – Present

Software Developer Intern | March 2026 – August 2026

- Promoted from intern to full-time Software Developer within five months, based on end-to-end ownership and delivery of core platform features.
- Built a full-stack Online Dispute Resolution (ODR) platform using Next.js, Node.js, Express.js, and PostgreSQL, owning the full software development lifecycle from database design to production deployment, serving [X] active users across [X] dispute cases.
- Designed and normalized a relational database schema on Supabase (PostgreSQL) across [X] tables with Row Level Security (RLS) policies, enforcing strict data privacy and multi-tenant isolation for confidential legal records.
- Implemented real-time chat and push notifications with WebSockets (Socket.io) backed by Redis message caching, enabling instant bidirectional communication and cutting message retrieval latency by [X]%.
- Developed [X]+ secure RESTful API endpoints with JWT authentication, role-based access control, and complex case-routing logic, and integrated AWS S3 for scalable document storage and evidence management.
- Collaborated in an Agile workflow using Git and GitHub for version control, pull-request code reviews, and iterative release cycles.

PROJECTS

NexusShop — Multi-Vendor E-Commerce Platform | Next.js, TypeScript, PostgreSQL, Supabase, Redux Toolkit, Razorpay

Live: <https://nexus-shop-chi.vercel.app/>

- Built a multi-vendor marketplace with seller storefronts, admin approval workflows, Razorpay payment gateway integration (test mode), and full order lifecycle management across buyer, seller, and admin roles.
- Implemented server-side input validation with Zod, API rate limiting, HMAC signature verification for payment webhooks, and middleware-based route protection with role-based access control.
- Managed global client state with Redux Toolkit and deployed to Vercel via a GitHub-based CI/CD pipeline.

Solar Plant EPC Firm Website | React, Node.js, Express.js, MongoDB

- Developed a responsive client-facing website for a solar energy company with RESTful Express.js and MongoDB backend APIs for secure form submission, lead capture, and lead management; delivered for production client use.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering | JECRC University, Jaipur

2022 – 2026 | CGPA: [X.XX] / 10

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Web Technologies.

LEADERSHIP & ACHIEVEMENTS

Hardware Head, RHYTHM'25 — JECRC University | January 2025 – March 2025

- Led a 50+ member cross-functional team to plan and execute robotics and embedded systems events across university departments.
